New Hope Foundation

Adoption Manager

User Manual

Getting Started

Installation

1. Run the Setup.exe file.
2. Click the Install button.
3. The NHFAM application installation window will open.
4. Click the Next button.
5. Select the installation location and whether the application will be installed for all users. By default, the application installs into the current user's local app data folder. Please note that if this location is changed, the user will need administrative rights to run the application, or an administrator needs to give all required users full permissions on the installation folder.
6. Click Next to begin the installation.
7. Click the Close button.
8. The SQL Server Express 2019 LocalDB installation window will open.
9. Click Next.
10. Accept the license agreement and click Next.
11. Click Install.
12. Click Finish.

Note: .NET Framework 4.8 must be present on the system for the application to install. If it is not present, install it using the ndp48-x86-x64-allos-enu.exe setup file.

The default credentials are:

Username: admin
Password: admin

Please change these default credentials as soon as possible to secure the system.

The source files can be found on GitHub: https://github.com/Tanaille/cmpg223-project

Uninstall

1. Close the application.
2. Open the control panel.
3. Select the New Hope Foundation Adoption Manager application from the list.
4. Click the uninstall button to remove the application.
